QUALITY ■ PRECISION ■ PERFORMANCE

Labcon Laboratory Equipment (LABCON[®]) is a company which manufactures a wide range of high-quality laboratory equipment comprising of ovens, incubators, growth chambers, water baths, magnetic stirrers, hotplates, shaking platforms and much more.

LABCON[®]'s factory is located in Chamdor, close to Johannesburg, South Africa

The business brand was established in 1976 when a niche market for laboratory equipment was recognized.

LABCON[®] is the market leader in South Africa for its products, which are manufactured locally in its own factory, all done under one roof. A process of continuous improvement ensures that products are at the forefront of existing technology, functionality and design.

LABCON[®]'s products are only made available to the retail market through selected distributors and are available throughout South Africa and in many global destinations.

Contact us and we will advise which of our distributor will be best located to service your needs.

Services

Equipment Maintenance Services & Repairs

For any maintenance faults or breakdowns on our equipment, we have a technician available to attend to your problem. At Labcon we pride ourselves on giving our customers the best service and technical support. Please think twice before your equipment is repaired by a local electrician or refrigeration technician. The equipment is delicate laboratory equipment and needs specialized personnel to repair and maintain the equipment.

Equipment Spares

We carry a vast range of spares for all our equipment and can ensure that the downtime on any equipment can be limited. We can ensure the availability of any spare of our equipment is in stock or readily available. If the spares that are required for your equipment obsolete we have measures and procedures in place to get the equipment up and running as soon as possible.

Customized Equipment Fabrication

At Labcon we pride ourselves on being on the forefront of the latest technology and manufacturing processes. This enables us to provide our customers with customized equipment that will conform to their specifications. We incorporate the latest 3D mechanical design & simulation software to ensure that the latest technology & manufacturing techniques are used in our manufacturing processes.

Contact us and we will advise which of our distributor will be best located to service your needs.
